Get Loan Application Payload

To retrieve the payload of submitted loan application use the following command

```
GET (example): https://qa.roostify.com/api/v1/loan_applications/{find_id}
```

You need credentials to perform the operation, using a global admin email id

On a terminal, run the following commands:

```
User.find_by(email:'{email id}').account.token
```

```
User.find_by(email:'{email-id}').account.services.map(&:access_token)
```

This returns something similar to the following:

```
{
    "id": "4724621543801656",
    "account_id": "6309862956296032",
